

HiLight H6+

Your site, your light!

The **HiLight H6+** light tower offers **low operational costs, reduced noise levels** and **increased illumination coverage**. It is ideal to use in tough environments, such as applications in construction, mining, and rental companies. The next generation of LED floodlights are more efficient and provide optimal light distribution covering an area up to 6,000m².

The **HiLight H6+** comes with three different ways of transporting

Straight / Foldable / Adjustable tow bar

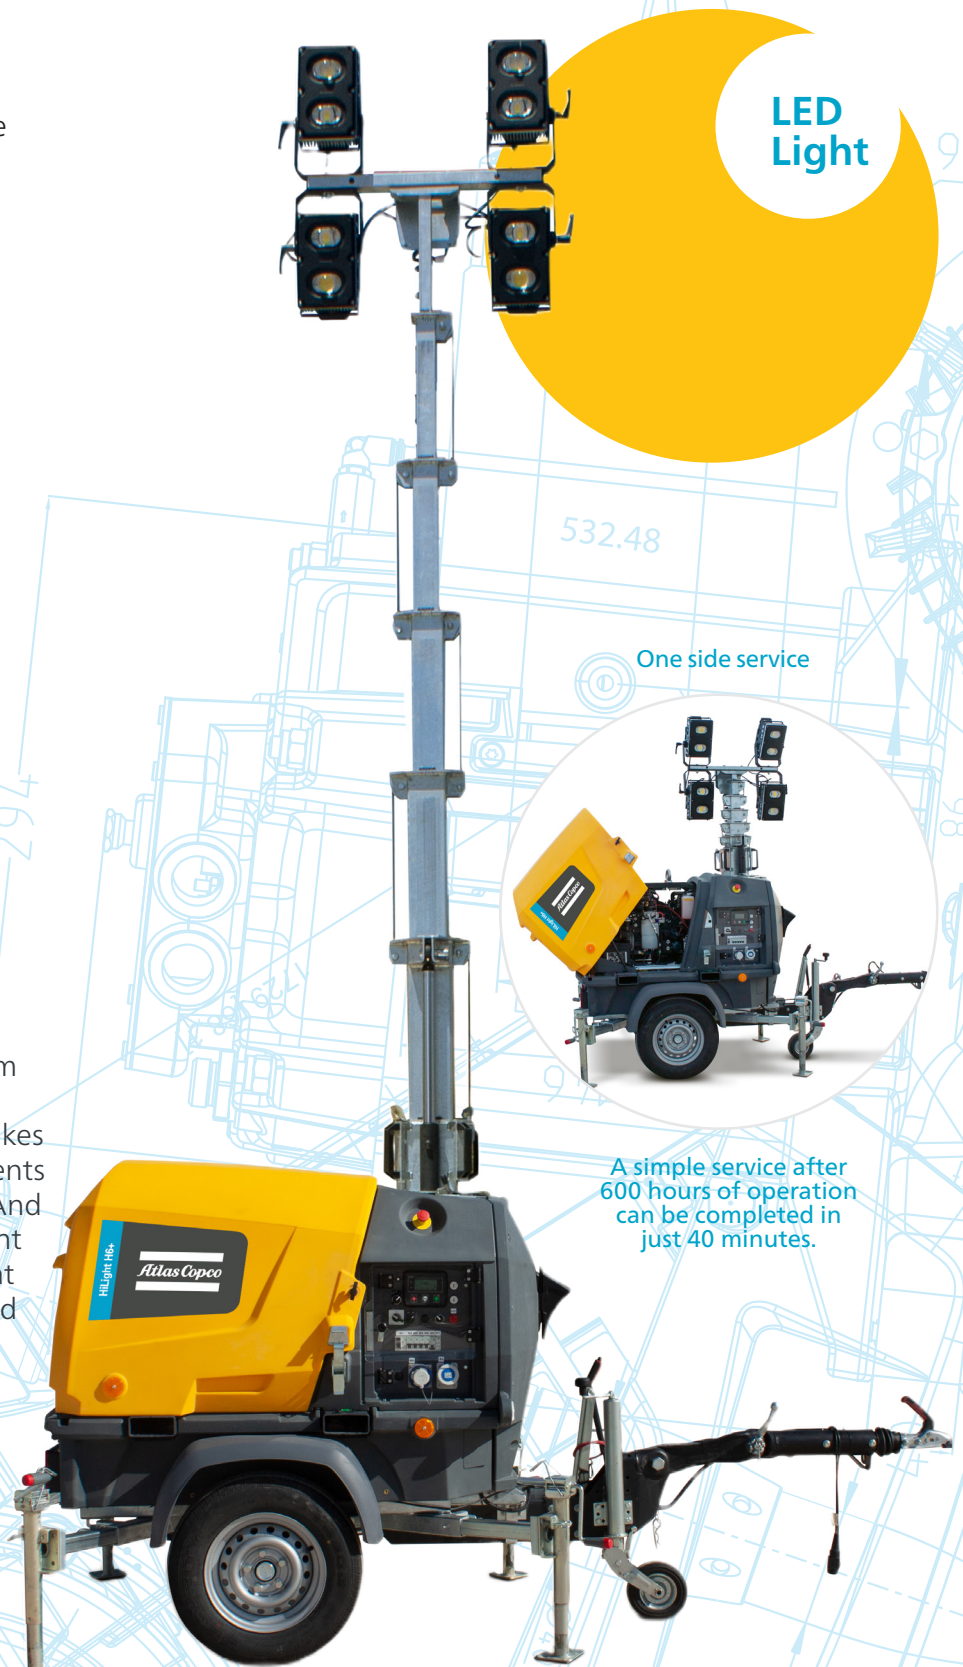

Forklift slots

Integrated lifting point

Our renowned **HardHat®** body protects the inside of the unit from the elements ensuring lasting performance. This 'toughness' makes it the ideal solution for environments within construction and mining. And being the quietest diesel drive light tower in the market (just 55dBA at 7m), it's also perfect for events and urban environments.

LED Light

One side service

A simple service after 600 hours of operation can be completed in just 40 minutes.
